A montage of shadowy figures and fragmented images bombards viewers during the film's opening, while gunfire, alarms ring, windows break, trains whistle and sirens scream. We soon discover that three desperate men (Toshiro Mifun, Takashi Shimura and Yoshio Kosugi) have just robbed a bank, and in a daring attempt to evade the authorities, they make a dangerous journey to northern Japan, where they hope to lose their stalkers in the snow-capped Alps. None of the men are prepared for their difficult ascent and they do not have the necessary survival skills to withstand a harsh winter outdoors. When forced to seek shelter in isolated ski chalets and in abandoned rangers, this only complicates their condition. And as the stress of their predicament begins to overflow, the tension grows, and soon the three robbers give to each other. Their unstable solidarity gives way to fear, mistrust and unreatant greed, but one man will eventually find bitter redemption among the demanding mountains. This extremely tense, truly moving and remarkably inventive film marks the introduction of many remarkable talents. Among them is 27-year-old Toshiro Mifun, who made his screen debut here and will eventually become one of Japan's most famous and most beloved actors. The film also launched the careers of composer Akira Ifukube (1953), Burmese Harp [1956], Rodan [1956], King Kong v Godzilla [1962], Daimajin [1966] and cinematographer Ji Seva, who began working on a number of documentaries, including Antonio Gaidy (1984). In addition, this is the first full-length feature, led by Shadowici Taniguchi and boasts the script written by Akira Kurosawa (Stray Dog , 1949), Seven Samurai [1954], Rashoman [1950], The Hidden Fortress [1958]), which was friendly with the director. Taniguchi and Kurosawa were worried about climbing and sometimes they did it together. I suspect their script may have been a joint attempt to bring some of the excitement they felt during their tourist trips to the screen. Snow Trail is the masterful debut of a director working in difficult conditions. The film was produced by Toho while the studio was in turmoil after World War II. At that time, much of Japan was in ruins and very few cinemas were still in operation. Toho managed to survive the war years, but film production has declined significantly from producing 76 films in 1940 to creating fewer than a dozen in 1945. In 1946, the labor dispute led to a mass strike and 450 employees left the studio in protest, including many of their biggest stars and best-accomplished directors. Desperate to stay in the old ways, Toho turned to new talent in an attempt to keep production moving. In this precarious environment, Shadovochi Taniguchi and Akira Kurosawa were able to get their script for Snow Trails, by Tomoyuki Tanaka and Taniguchi with Obligators. Takashi Shimura (No Regrets for Our Youth 1946), No Remorse [1946], Bedri Dog [1949], Akiru [1952], Seven Samurai [1954], Godzilla [1954], Kwaidan [1960]), a longtime actor and toho regular who often worked with Kurosawa, were on board starship. The studio has also benefited from a new talent called Toshiro Mifun, but Mifune is reluctant to take on the role. The future star of Japanese cinema was originally hired by Toho as a camera operator. Mifune hopes to continue down this path and become a cinematographer or director one day, but his plans were interrupted when friends and colleagues secretly entered his picture in a Toho talent contest, looking for new faces. After the labor dispute that lost Toho 450 employees, the struggling studio desperately needed new talent, and Mifune's pushing good looks and command presence made him very attractive to directors. He won the competition along with 48 other contestants (over 4,000 will be actors reportedly) and cautiously agreed to appear on the Snow Trail, but Mifune is not interested in changing careers. Through the photos, he eagerly continued to work with the camera, which carried heavy equipment across the terrain of the untreated mountainous terrain, but his work was for nothing. When the Snow Trail opened in Japan in the summer of 1947, Mifun's fate was sealed. The hesitant actor became a star overnight, and despite a few exceptions, he spent the rest of his life in front of the camera instead of behind her. Snow Trail made quite an impression on Japanese viewers when it was released and for good reason. At the time, Japanese cinema was dominated by melodrama, tragedy and comedy. It's a tense action-oriented film that is visibly influenced by Hollywood films with unimitable characters performing horrific acts that viewers have been asked to identify with. In my title, I called Snow Trail Film Noir, but it's a somewhat amalgam of early American crime films and adventurous photographs sharing different DNA with The Forest (1936) and High Sierra (1941), as well as The Call of Wildlife (1935) and Northern Forest DNA (1943). He was also a worthy precursor to such acclaimed price as The Treasure of the Sierra Madre (1948), Wages of Fear (1953) and The Dangerous Places (1951). In addition to the noir-in-the-open montage, the film features some spectacular outdoor shots, exciting action sequences (including an exciting sequence of skiing), some surprsing (and discreet) male nudity and two great central performances by its leading actors. It's hard to take your eyes off Mifun. It is a stunningly beautiful, towering male aggression, threatening to explode at any moment. As I watched him, I was reminded of how the audience felt when they first saw Marlon Brando in a street box called Desire (1951). Mifune is so natural, so modern and so mesmerizing that it almost looks like he has fallen off Planet. Japanese film historian and and Tadao S&ao wrote about Mifune's screen debut in Akira Kurosawa's World, noting that The Movie Guests were used to actors whose faces reflected a certain satisfaction with being a star. But here it was a completely different kind. The actor's face expresses resentment for everything around him... It was the face that many in the audience longed to show the world, but did not dare. They became instant Mifune fans, dealing with his contemptuous expression as much as for the roles he played. While Frequent Akira Kurosawa collaborator Theruyo Nogami (Rashemon 1950), Ikiu [1952], Seven Samurai [1954], The Hidden Fortress [1958] called Snow Trail a fresh masterpiece of postwar Japanese cinema built on the combined efforts of newcomers, and I am inclined to agree with it. After Snow White, Japanese cinema will never be the same. Mifune's menacing performance attracted a lot of attention from critics and audiences, but was also coupled with the transformative performance of his accomplished co-star Takashi Shimura. Although not recognizable to American filmmakers, Shimura appeared in more of Akira Kurosawa's films than Mifun and probably best remembered her roles in Akiru and the Seven Samurai. In Snowy Trail, Shimura plays one of the most complex characters in his long and varied career. He is a disturbing criminal who has a change of heart that is beautifully reflected in body language and emotive expressions. His underappreciated and famous is hard to forget. The lack of information limits my ability to discuss Director Shadowy Taniguchi. The director is usually cast as a rock note in Woody Allen's career, after the Oscar-winning director killed off Taniguchi's much-entertaining Stry International Secret Police: Key to the Keys, K.S. Kok kok hitsu keasu: Kaji no kagi (1965) to do What Is It, Tiger Lily? That's a terrible pity, because Taniguchi's original film is a very funny cheek roll, which I find much more entertaining in itself than Allen's bad remix. Only after watching two of Taniguchi's films is it difficult to appreciate his career, but according to IMDB.com, there are over 30 directing and writing credits. He also worked as an associate producer on Kurosawa's magnificent Stry dog (1949) and the Kon Ichikawa Olympics (1965). If Snow Trail and the International Secret Police: Key to the Keys are any signs, Shadow Taniguchi is a director and screenwriter whose career is in terrible need of reassessment and undoubtedly contains other forgotten gems and unusual genres. Criterion owns the American Snowy Trail rights, but for some unknown reason they didn't put it on DVD. If you want to watch it, you'll need to see it HULU.com where it's currently streamed online. Let's hope he shows up on TCM on Sunday night, where he can find a good audience to embrace this neglected masterpiece of Postwar Japanese cinema. written for the Turner Classic films and published on December 10, 2015.
